INDEX TO VOLUME VII.

A.

Academy of Nat. Sci. Philad., proceedings of, 458.
Acid springs of Onondaga salt group, *T. S. Hunt*, 175.
——, sebacic, action of nitric acid on, *A. Schlieper*, 420.
Ægean, fauna of, 300.
Agassiz, Bibliographia of, noticed, 454.
Alabama, nummulites of, 114.
Albite of Upper California, 253.
Albumen, new products from decomposition of, 107.
——, analyses of, 110.
Ale, inorganic constituents of, 102.
Alexander, J. H., new formula for interpolations, 14.
——, new protractor for trisecting angles, 243.
——, new table of pressure of steam at various temperatures, 361.
Alexander, S., fundamental principles of mathematics, 178, 329.
——, on the common origin of the small planets, 447.
Allophane and Gibbsite, *B. Silliman, Jr.*, 411.
Almanac, observations on an American nautical, 123.
Amalgamating zinc, new mode of, *O. N. Stoddard*, 431.
America, Western, observations on, *J. D. Dana*, 376.
——, ——, coast of, 377.
——, ——, mountains of, 380.
——, ——, rivers and valleys, 284.
——, ——, forest and prairie regions and climatal cause of distribution, 387, 389.
American Academy of Arts and Sciences, memoirs of, vol. iii, 149.
——, proceedings of, 458.
American Association for the Promotion of Science, titles of *J. Hall's* memoirs read before, 151.
American Ethnological Society, transactions of, 456.
Analysis, chemical, J. E. Bowman's work on, noticed, 455.
—— of several minerals, 113.
—— of lavas of Hecla, 114.
—— of the Braunau meteoric iron, 171.
—— of ashes, *Fleitmann*, 292.
—— of American minerals, *J. D. Whitney*, 433, 434, 435.
Angles, protractor for trisecting, *J. H. Alexander*, 243.
Antarctic voyage of J. C. Ross, reviewed, 313.
—— —— ——, departure for the Antarctic, 324.
—— continent, seen by J. C. Ross, 325.
—— ——, volcanoes of, 328, 329.
Arkansite identical with Brookite, *J. D. Whitney*, 433.
Artificial crystallization of gems, *Ebelman*, 427.
Ashes, analysis of, *Fleitmann*, 292.
Asteroid, Diana, not discovered, 290.
Astronomical clock with galvanic register, 206.
Atmosphere, height of plane of vapor of, in tropics, *J. C. Ross*, 315.
Auckland islands, 322.
Auroral bow of April 7, 1847, *E. C. Herrick*, 126.
Aurora borealis of Nov. 17, 1848, 127, 293.
—— —— of Oct., 1839, *J. C. Ross*, 315.
Aurora australis, *J. C. Ross*, 322.
Australia, flood in, 130.
——, expedition into, projected by Mr. Kennedy, 137.
——, mines in, 138.
Axinite in Maine, 286.

B.

Bache, A. D., notice of work by, on magnetic and meteorological observations of Girard College, 455.
Bailey, J. W., on the Navicula Spencerii, in reply to *Mr. Quekett*, 265.
——, infusoria of Maryland, 437.
Banka, on the island of, *T. Horsfield*, 86.
Basaltic rocks, and columns, Kerguelen's Islands, 318.
Beeswax, *B. C. Brodie* on, 427.
Berkeley's theory of vision, *D. Brewster*, 273.
—— ibid, *Whewell*, 274.
Birds of Mexico, *G. A. McCall*, 114.
——, new species of, *J. Cassin*, 115.
Bismuth, telluret of, from Virginia, *C. Fisher, Jr.*, 282.
——, crystalline polarity of, *M. Faraday*, 425.
Bittern of a saline on the Kiskiminetas, 74.
Blast furnaces of Ystalyfera, use of gases of, *J. Palmer Budd*, 303.
Bond, G. P., a new comet, April 11, 1849, 449.
Boring of Mollusca, *A. Hancock*, 288.
Bourbon, birds of isle of, 65.
Bowman, J. E., on chemical analysis, noticed, 455.
Boyé, M. H., bittern of a saline on the Kiskiminetas, 74.
Brandisite, analysis of, 113.
Braunau meteoric iron, *N. W. Fischer*, 171.
Brazil, compact diamond of, 433.
Brewster, D., on Berkeley's theory of vision, 273.
British Association Reports, for 1848, 270 and beyond.
Brodie, B. C., on wax, 427.
Bromine in a bittern, *M. H. Boyé*, 74.
——, new mode of detecting, 106.
Brown, existence of color, 129.
Brucite, nemalite identical with, 434.
Brucke, E., on the color brown, 129.

Budd, J. P., use of gas from furnaces of Ystalyfera, 303.
Butyric aldehyde, 108.

C.

Cabbage plant of Kerguelen's Island, 319.
Calendar stone of Mexico, *E. G. Squier*, 153.
California, gold in, 125, 262.
——, climate of, 291.
——, notes on, *J. D. Dana*, 247.
——, Shasty Peak in, 250.
—— chalybeate spring, 250.
——, observations on, and on the gold of, *C. S. Lyman*, 291, 305, 307.
——, on some points in the physical geography of, *J. D. Dana*, 376.
Californian gulf, discovery of, &c., 378.
—— peninsula, 388.
Campbell's Island, Antarctic seas, 322, 323.
Camphor, *Dr. C. List*, 430.
Cancrinite, 433.
Cantu, G. L., new test of bromine and iodine, 106.
Carey, J., on some N. Y. Chenopodiaceæ, 167.
Carolinas, new and rare plants of, *M. A. Curtis*, 406.
Cascade mountains, Oregon, 381.
Caseine, products of decomposition of, 107.
Cassin, J., new species of birds, 115.
Ceramohalite, 113.
Cerotine and cerotol, 428.
Chambers's Ancient Sea Margins reviewed, 1.
Charts, ecliptic star, 290.
Chemical action, light preventing, *R. Hunt*, 272.
Chemical analysis, work on, by *J. E. Bowman*, noticed, 455.
Chemistry, Gmelin's, noticed, 456.
Chenopodiaceæ from near New York, *J. Carey*, 167.
Chimpanzee, daguerreotypes of, 303.
Chloroform used for motive power, 304.
—— as a solvent, 305.
Chloropicrine, *J. Stenhouse*, 429.
Christmas Harbor, Kerguelen's island, 318.
Chromic iron of Asia Minor, *J. L. Smith*, 285.
Claudet, effect of different colored rays of light in photography, 272.
Climate of Upper California, 248, 291, 389.
—— of Italy, 304.
—— of Tierra del Fuego, 392.
Climatal cause of distribution of forests and prairies in western America, 389.
Coal, on the comparative value of, for illumination, *A. Fyfe*, 77, 157.
—— in the straits of Magellan, 304.
—— Kerguelen's Island, 318.
—— on the Nile, 436.
—— of Vancouver's Islands, 436.
Coast Survey Report for 1847–1848, noticed, 311.
Color brown, existence of, *E. Brucke*, 129.
Colors red and blue in worsted, apparent motion in figures of, 132.
Coloring matters, Report on, *E. Schenk*, 275.
Columba leucoptera, 115.
Comet, new, of *G. P. Bond*, Nov., 1848, 123.
——, ——, of April 11, 1849, discovered by *G. P. Bond*, 449.
——, *Petersen's*, of Aug., 1848, 122.
Comet medal given to Miss Mitchel, 123.
Copper of Lake Superior, *C. T. Jackson*, 286.
Coral near Prince Edward's Island, 317.
—— of antarctic regions, 327.
Cotton, American, in India, 135.
Crowe, cabinet of minerals for sale, 138.
Crozet's group of islands, 317.
Crystallization, artificial, of gems, *Ebelman*, 427.
Current around Cape Horn, *J. C. Ross*, 316.
Curtis, M. A., new and rare plants, chiefly of the Carolinas, 406.
Cuttle fish, leap over ship, *J. C. Ross*, 316.

D.

Dana, J. D., review of Chambers's Ancient Sea Margins, with observations on the study of terraces, 1.
——, notes on Upper California, 247.
——, on modes of occurrence of gold in California, 262.
——, on some points in the physical geography of Oregon and Upper California, 376.
——, fiord zones of the globe, and their bearing on areas of subsidence, 379, 380.
De Candolle's Prodromus, pars xii, 309.
Decomposition of albumen, &c., new products from, 107.
Deville, crystallization of sulphur, 282.
Diamagnetism, experiments on, *H. C. Œrsted*, 233.
——, ——, *Plücker*, 270.
Diamond, compact, of Brazil, 433.
——, phosphorescence of, 433.
Diana, the 10th asteroid, denial of discovery of, 290.
Dickson, T., inorganic constituents of ale and porter, 102.
Dinornis, *Owen's* memoir on, noticed, 151.
Dispersion of light, *E. B. Hunt*, 364.
——, bones of, *G. A. Mantell*, 28.
Dodo, review of Strickland and Melville on, 52.
Drift, remarks on, 2.

E.

East Island, 317.
Ebelman, G. M., researches on compounds of titanium, 106.
——, artificial crystallization of gems, 427.
Ecliptic star charts, 290.
Ehlite, analysis of, 113.
Elasticity of metals and latent heat, coëfficient between, *C. C. Person*, 128.
Electric battery, Leyden, a novel mode of discharging, *J. H. Lane*, 418.
Electric light, *Staite's*, 450.
Emery formation of Asia Minor, *J. L. Smith*, 283.
Emerylite, a new mineral, *J. L. Smith*, 285.
Ethnological Society Transactions, 456.
Euplectes nigroventris, 116.
Eyes, why one object seen with two, *J. Locke*, 68.
——, —— ibid, *S. P. Lathrop*, 343.

F.

Faraday, M., crystalline polarity of bismuth, &c., and magnetic form of force, 425.

Feldspar in the orbicular diorite of Corsica, 113.
Fendler, botanical collections in New Mexico, 452.
Fiords of Western America, 379.
—— of the globe, zones of, evidence of subsidence, 379, 380.
Fischer, N. W., on the Braunau meteoric iron, 171.
Flood in the Indus, 129.
—— in the Macquarie, Australia, 130.
Force, magnetic form of, *M. Faraday*, 425.
Forests of Western America, distribution of, 337, 389.
Fossil birds and mammals of New Zealand, 28.
Fossils of palæozoic formations of Europe and America, comparative view of, *E. de Verneuil*, 219.
—— ibid, notes on, *J. Hall*, 221.
Fossil trees, Kerguelen's island, 318.
Foster, E., obituary of, 451.
Fownes, G., obituary of, 451.
Fundamental principles of mathematics, *S. Alexander*, 178, 329.
Furnaces of Ystalyfera, use of gas from, 303.
Fyfe, A., on comparative values of coal for illumination, 77, 157.

G.

Galvanic register to astronomical clock, 206.
—— ignition, cooling effects of hydrogen in, *W. R. Grove*, 74.
Gas for illumination, on coal for, *A. Fyfe*, 77, 157.
Gelatine, products of decomposition of, 107, 109.
Gems, crystallized by heat, *Ebelman*, 427.
Genth, on minerals and rocks of Hecla, 114.
Geological Society of London, anniversary of, 451.
Geology, parallelism between European and American, as regards palæozoic rocks, *E. de Verneuil*, 45, 218.
—— of Charleston, S. C., 187.
—— of Crozet group, 317.
—— of Kerguelen Island, 318.
—— of Auckland Island, 322.
Georgia Historical Society, volume by, noticed, 151.
Gibbes, R. W., fossil Squalidæ of U. States, 441.
Gibbsite and allophane, *B. Silliman, Jr.*, 411.
Gilmor, R., obituary notice of, 142.
Girard College, magnetic and meteorological observations, 455.
Glen Roy Roads, 7.
Gmelin's Chemistry, noticed, 456.
Goitre, due to magnesian salts in water, 304.
Gold in California, 125, 290, 305, 307.
—— ——, assay of, at U. S. mint, 125.
—— ——, rocks accompanying, *J. D. Dana*, 262.
—— of Africa, 436.
—— mining in Virginia, 295.
Goldfuss, A., obituary notice of, 143.
Granite of Upper California, 253.
—— of antarctic regions, 326.
Gray, A., notice of De Candolle's Prodromus, 309.
——, notice of botanical collections in New Mexico, 452.
Gray, A., notice of Hooker's London Journal of Botany and Kew Garden Miscellany, 453.
——, notice of Posthumous papers by Wm. Griffith, 454.
Great Basin, California, 332.
Griffith, A., notice of Posthumous papers of, 454.
Grove, W. R., cooling effects of hydrogen in voltaic ignition, 274.
Guckelberger, G., volatile products from the decomposition of albumen, &c., 107.
Gun-cotton, for tooth ache, 304.
Guthrie, S., obituary notice of, 143.
Gutta percha or taban, 203, 276.
Gypsum of Onondaga salt group, origin of, 175.

H.

Haldeman, S. S., notice of Agassiz's Bibliography, 454.
Hall, J., translation of Verneuil on American and European palæozoic formations, with notes, 45, 218.
Hancock, A., boring of mollusca, 288.
Hauyne, 435.
Hawaii, old crater adjoining Kilauea, 287.
Hecla, rocks and minerals of, *F. A. Genth*, 114.
Height of Maderia, 314.
—— of antarctic mountains, 325.
—— of Oregon and California mountains, 383, 387, 388.
Hell, Hommaire de, obituary of, 451.
Herrick, E. C., auroral bow of April, 1847, 126.
——, aurora borealis of Nov. 17, 1848, 127, 293.
Hildreth, S. P., meteorological Journal for 1848, 240.
Holmes, F. S., geology of Charleston, S. C., 187.
Hooker's London Journal of Botany and Kew Garden Miscellany, 453.
Horsfield, T., on the island of Banka, 86.
Hunt, E B., on the dispersion of light, 364.
Hunt, R., influence of light in preventing chemical action, 272.
Hunt, T. S., products of decomposition of gelatine, &c., 109.
——, on acid springs and gypsum of Onondaga salt group, 175.
Hydrogen, cooling effects of, in voltaic ignition, *W. R. Grove*, 274.

I.

Ice, manufacture of, 280.
Icebergs of the antarctic, *J. C. Ross*, 324 and beyond.
Iguanodon, new discoveries of bones of, *G. A. Mantell*, 150, 438, 439.
India, tea and American cotton in, 135.
Indians of the Upper Sacramento, 286.
Infinite quantities, considerations on, *S. Alexander*, 333.
Infusoria of Maryland, 437.
Interpolations, new formula for, *J. H. Alexander*, 14.
Inundation, see *Flood*.
Involution and evolution by logarithms, *J. L. Riddell*, 232.

Iodine, new mode of detecting, *G. L. Cantu*, 106.
Iron, analysis of wrought, *Miller*, 276.
Italy, climate of, 304.

J.

Jackson, C. T., copper of Lake Superior, 286.
Jasper in Upper California, 257, 261.
Jobert, A. C., Philosophy of Geology, and Ideas of a new System of Philosophy, noticed, 150.

K.

Kerguelen's Island, 318.
Kilauea, on the old crater adjoining, *C. S. Lyman*, 287.

L.

Lake Superior region, copper and silver of, 286, 287.
——, Great Salt, 382.
——, Pyramid, Upper California, 382.
Lane, J H., on a novel mode of discharging a Leyden battery, 418.
Lathrop, S. P., on single and double vision, 343.
Laurent, A., composition of tungstates, 281.
Lava of Hecla, *F. A. Genth*, 114.
Lawrence scientific school, 303.
Leyden battery, a novel mode of discharging, *J. H. Lane*, 418.
Le Verrier on Neptune, 118, 442.
Light, effect of different colored rays of, in photography, 272.
——, influence of, preventing chemical action, 272.
——, on the dispersion of, *E. B. Hunt*, 364.
——, galvanic, polarization of, *C. G. Page*, 375.
List, J. C., on turpentine camphor, 430.
Lochaber, parallel roads of, 7.
Locke, J., on single and double vision, 68.
——, astronomical clock with telegraphic register, 206.
Lyceum of Nat. Hist. of New York, annals of, 311.
—— ——, officers of, 311.
Lyell, C., nummulites of Alabama, 114.
Lyman, C. S., on the old crater adjoining Kilauea, 287.
——, on California and the gold mines, 290, 305, 307.

M.

Macculloch, on the roads of Lochaber, 7.
McCall, G. A., notes on Mexican birds, 114.
Madeira, height of, 314.
Magellan Straits, coal of, 304.
Magnesia, nemalite a hydrate of, 434.
Magnetic and meteorological observations at Girard College, work on, noticed, 455.
Magnetic equator, *J. C. Ross*, 315.
—— form of force, *M. Faraday*, 425.
—— needles influenced by rocks, 315, 322.
—— observations, by *J. C. Ross*, in his Antarctic voyage, 316, 317, 320, 321, 322, 329.
—— pole, position of southern, *J. C. Ross*, 325.
Magnetism, see *diamagnetism*.
Magneto-tangential machine, *O. N. Stoddard*, 432.
Manna, *J. Stettner*, 112.
Mantell, G. A., Fossils of New Zealand, 28.
——, memoir by, on Belemnites, noticed, 150.
—— ——, on Iguanodon, noticed, 150.
——, new discoveries of bones of Iguanodon, 438, 439.
Mathematics, fundamental truths of, *S. Alexander*, 178, 329.
Mauritius, Dodo and other animals of, 52.
Meerschaum of Asia Minor, *J. L. Smith*, 285.
Melville on the Dodo, reviewed, 52.
Meteor appearances, Antarctic Ocean, *J. C. Ross*, 320.
Meteoric iron of Braunau, *N. W. Fischer*, 171.
Meteoric iron in South Carolina, *C. U. Shepard*, 449.
Meteorological Journal at Marietta, *S. P. Hildreth*, 240.
Meteorology, Piddington's work on, 144.
——, Redfield's labors in, 145, 146.
Mexican birds, notes on, *G. A. McCall*, 114.
Mexico, calendar stone of, *E. G. Squier*, 153.
Microscopes, Spencer's, and on a difficult test object, *J. W. Bailey*, 265.
Milk, mode of preserving, *F. H. F. Louis*, 431.
Miller, analysis of wrought iron, 276.
Mines, tin, of Banka, 86.
—— in Australia, 138.
Minerals, Dr. Crawe's cabinet of, for sale, 138.
—— crystallized by heat, *Ebelman*, 427.
——, on some American, *J. D. Whitney*, 433, 434, 435.
——, Allophane of Richmond, Mass., 416; Arkansite, identical with Brookite, 433; Axinite in Maine, 286; Bismuth, telluret of, from Virginia, 282; Brandisite, 113; Cancrinite of Litchfield, Me., 436; Ceramohalite, 113; Chrome of Asia Minor, 285; Coal of the Nile, 437; Coal of Vancouver's Island, 436; Coal of Straits of Magellan, 304; Copper of Lake Superior, 287; Coracite, 434; Ehlite, 113; Emery of Asia Minor, 283; Emerylite, 285; Feldspar of Corsica, 113; Gibbsite of Richmond, Mass., 411; Gold Mining of Virginia, 295; Gold of Africa, 436; Gold of California, 125, 262, 291, 305, 307; Hauyne, 435; Meerschaum of Asia Minor, 285; gold, mining, of Virginia, 295; Nemalite, 434; Nosean, 435; Ozarkite identical with Scolecite, 434; Pectolite and stellite identical, 434; Platinum in the Alps, 137; Schorlomite, 433; Silver, native, of Lake Superior, 288; Silver, native, of Norway, 305; Sodalite of Litchfield, Me., 435; Thjorsauite, 114; Volknerite, 113; Vosgite, 113.
Mineralogical Society of St. Petersburg, transactions of, 457.
Mitchell, Maria, comet medal to, 123.
Mollusca, on the boring of, *A. Hancock*, 288.
Motive power, chloroform used for, 304.
—— —— of water in spheroidal state, 304.
Mountains of Madeira, height of, 314.
—— of Antarctica, 325.
—— of Western America, their parallelism, &c., 380.

N.

Naphtha of Alfreton, Eng., 305.
Nautical Almanac, remarks on an American, 123.

Navicula Spencerii, and another more difficult test object, *J. W. Bailey*, 265.
Nemalite identical with Brucite, 434.
Neptune, *Le Verrier* on the planet, 118, 442.
New Zealand, fossil birds of, *G. A. Mantell*, 28.
Nile, exploration of, by *Dr. Bialloblotzky*, 138.
Nitric acid, action of, on sebacic acid, *A. Schlieper*, 420.
Norway, native silver of, 305.
Nosean, 435.
Nummulites of Alabama, *C. Lyell*, 114.

O.

Oakes, Wm. obituary of, 138.
Obituary of *E. Foster*, 451.
—— of *G. Fownes*, 452.
—— of *Hommaire de Hell*, 451.
—— of *R. Gilmor*, 142.
—— of *A. Goldfuss*, 143.
—— of *S. Guthrie*, 143.
—— of *Wm. Oakes*, 138.
—— of *Dr. Prichard*, 452.
Obsidian in California, 250.
Oceanic current around Cape Horn, 316.
Œrsted, H. C., experiments on diamagnetism, 233.
Optics, facts relating to single and double vision, *J. Locke*, 68.
—— ibid, *S. P. Lathrop*, 343.
Orang-otang, daguerreotypes of, 303.
Oregon, on some points in the physical geography of, *J. D. Dana*, 376.
——, coast of, 377.
——, mountains of, 380.
——, mines and valleys of, 384.
——, forest and prairie region and climatal cause of their distribution, 387, 389.
Orpheus curvirostris, a Mexican bird, 114.
Otters in Hadley, Mass., 117.
Owen on the Dinornis, noticed, 151.
Oysters, not hermaphrodite, 437.
Ozarkite identical with scolecite, 434.

P.

Page, C. G., Polarization of galvanic light, 375.
Palæozoic rocks of America and Europe, parallelism of, *Ed. de Verneuil*, 45, 218.
Palmer, A. H., memoir on Eastern Countries, noticed, 148.
Pectolite, 434.
Penguins in Crozet group, 317.
Percy, on alloys of tungsten, 276.
Person, C. C., on relation between elasticity of metals and latent heat, 128.
Petersen's Comet of Aug., 1848, elements of, 122.
Philosophy of Geology, by *A. C. G. Jobert*, noticed, 150.
Phosphorescence of Diamond, 433.
Phosphorus, *Schrötter*, 111.
Photography, action of different rays of light, 272.
Piddington, Sailor's Horn Book, 144.
Pig Island, 317.
Pitylus flavo-cinereus, 117.
Planet Neptune, *Le Verrier* on, 118, 442.
—— Saturn, eighth satellite of, 122.
Planet Diana, 10th asteroid, not discovered, 290.
Planets, small, on Olbers's theory respecting, *S. Alexander*, 447.
Plants, salt a poison to, 299.
—— of Kerguelen's Island, 318.
——, American species of Potamogeton, 347.
——, Chenopodiaceæ of New York, 167.
——, new and rare, chiefly of the Carolinas, *M. A. Curtis*, 406.
Platinum in the Alps, 137.
Plücker, on Diamagnetism, 270.
Polarization of galvanic light, *C. G. Page*, 375.
Porter, inorganic constituents of, 102.
Possession Island, 317.
Potamogeton, American species of, *E. Tuckerman*, 347.
Prairies of Upper California and Oregon, 247, 256, 387, 389.
Prichard, Dr., obituary notice of, 452.
Prince Edward's Island, 317.
Prizes of Belgium government, 305.
Proteine, analysis of, and researches on, 109, 110.
Protractor for trisecting angles, *J. H. Alexander*, 243.
Pyrenestes coccineus, 116.

R.

Rain from a clear sky, 315.
Randall, W. B., salt a poison to plants, 299.
Redfield's labors in Meteorology, 145.
Reptiles, two from Oregon, *A. J. Skilton*, 202.
